DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 43-51, drawn to a reaction assembly, classified in class 422, subclass 131.
 - II. Claims 26-42, 52 and 53, drawn to a method for chemical synthesis, classified in class 536, subclass 25.3, and a method of synthesis including control, classified in class 700, subclass 268.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I, respectively, are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used for a microbiological assay with pipetting by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I not required for Group II, restriction for examination purposes as indicated is proper.

2. If Applicant elects Group II, restriction to one of the following inventions is required under 35 U.S.C. 121:
 - IIA. Claims 26-42, drawn to a method for chemical synthesis, classified in class 536, subclass 25.3.
 - IIB. Claims 52 and 53, drawn to a method of synthesis including control, classified in class 700, subclass 268.

Art Unit: 1764

The inventions are distinct, each from the other because of the following reasons:

Inventions IIA and IIB are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IIA has separate utility such as a synthesis method for chemical indicators on paper test strips. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group IIA not required for Group IIB, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
